

Two Draw Games For McEllan Cup

Legion and Diamond D's
Play Again Friday

If the games played so far in the McEllan Cup competition are any criterion, football fans are in for an exciting season in the local league. Although this was a knock-out competition, the winners of the cup have not yet been decided, as the two final games played so far between the Legion and the Diamond D's have ended in draws.

The game last Friday evening in Medicine at was a 2 to 2 draw and to replay here on Tuesday ended in a scoreless draw.

In Friday's game the Legion had their two goals on ice and the second period was well advanced when the Diamond D's came from behind with an onslaught which will long be remembered by their supporters. So exciting was their attack that the Legion goalies forgot himself and fouled Lawson in the goal mouth. In the penalty kick which followed, a goalie saved nicely but T. Davies got the rebound and shot wide. "Wow!" exclaimed the Redcliff fans, "who stole our rabbit's foot!" However the disappointment soon changed to unbounded glee for within the next few minutes Bill Willis and Len Henderson each booted the net for the Diamonds and tied the score with only a few minutes left to play. The game was very even and the last ten minutes of the game were decided by the best of it and were only prevented from winning out by the stubborn work of the Legion defence.

The game on Tuesday was considerably spoiled by the high south-west wind which prevailed throughout, making accurate passing and shooting impossible. To make matters worse for the Diamond D's they played almost the entire game with one man short as Len Henderson was disabled early in opening tana and was unable to come back into the game. Our readers know what a howl they think of rules which are allowed to continue to make such a handicap as this possible. This was a very serious disadvantage to the local team as time after time in their attacks in the second half the lack of the 11th man was very noticeable at the critical moment. It was very unfortunate as we have no doubt the Diamond D's would have won out but for the accident. However they did remarkably well to hold the game down to a draw under the circumstances.

The Diamonds still have at least one more chance to win the trophy. The next game will be played here on Friday evening of this week when the same teams will meet again to try to break the deadlock.

Maxine Brownlee, a former pupil of Redcliff school but now of Calgary, was the leader of the recent musical festival in the schools in that city on behalf of the class Maxine was presented with the trophy by Mayor Davidson. Since hearing the news her Dad, who is now in Redcliff, has composed a new song entitled: "Be's more like her Dad every day".

Softballers Have Won And Loss For Week

Arranging For Game Here
Next Sunday

Local softballers start off the week with a nice win from the Medetlas in the game here. It was a real hum dinger of a game and the local lads were in good form much to the delight of a large crowd of fans.

A feature of the game was the introduction of Jim Lowson on the mound for the Red Caps and he made such a splendid showing with his pitching that he kept the visiting team guessing throughout the game, and very few hits were made.

The game was air-tight throughout, the home team winning out by 6 runs to 5.

On Monday evening a league game was played in Medicine Hat against the Moose, who won by the narrow margin of 7 to 5. This also was a good exhibition with the exception of one innings in which several errors in the infield lost the Red Caps the game. Up to this time they were in the lead but the errors were very costly, allowing several runners to cross the plate and gain the advantage which they held to the finish.

We understand arrangements are being made for a game between married and single players for next Sunday afternoon.

Salary Cut For Senators and Judges

As an economy move, the House of Commons gave final passage to the bill that topped 10 per cent of civil service salaries and the seasonal indemnities of Senators and members of Parliament.

Another measure leaving a special income tax of 10 per cent against judges, army and navy men and the Royal Canadian Mounted Police, was given second reading. These classes were exempted under the former bill.

An epidemic of measles appears to be rampant in Calgary.

WILL HOLD STAMPEDE HERE ON JULY THE 1st

Good Program of Horse Races, Steer Riding, Bucking Contests And Athletic Events For Children is Now Being Arranged.

At the annual meeting of the Redcliff Stampede Association, held last week end, it was decided to proceed with the necessary arrangements for the annual stampede to be held here on Dominion Day, July 1st. Judging from the enthusiasm of all present at the meeting, nothing will be overlooked in an endeavor not only to maintain the records of the past but also to introduce new novelties that are bound to add to the success of the day. There will be the usual program of horse races of all kinds, bucking contests, and steer riding, and special plans are under way for a big program of athletic events for the school children.

One added attraction which should prove interesting and amusing will be a procession which will be arranged by a committee composed of W. J. Campbell, R. S. Hodge and J. R. MacKenzie. When their plan is made known it is hoped all the citizens will give the committee support and encouragement in helping to put it over.

Refreshment booth privileges will also be available for local organizations on the same terms as last year. Applications for same should be made to the secretary as soon as possible.

Last year's officials were prevailed upon to continue in office this year and vacancies on the committee were filled. The following is the list of officers for this year:

President—Ed. L. Stone
Vice Pres.—W. H. Dacre.
Secretary—J. E. Tarrant.
Treasurer—R. S. Hodge.

Strathmore Farm Holds Three Milk and Butter Production Records

When milk and butter are the topic of conversation, attention must needs be directed to the Canadian Pacific Railway's supply farm, at Strathmore, Alberta, where specialists have established outstanding production records for 1937, for the province of Canada. There is little to choose between the three cows shown in their pictures tells the story. Excellent stock, well handled, has once more proven its worth.

W. W. Jones, the company's Superintendent of Agriculture and Animal Industry, is justly proud of the achievement.

When the Milk and Butter Government regulation, led all the milk producers in Canada by over 2,000 lbs. of butter, completed a yearly record on November 27, 1937, with 3,644 lbs. of milk and 1,156 lbs. of butter. In 1936, a four-year-old, she had another record, with 29,365 lbs. of milk and 1,071 lbs. of butter.

The next highest milk production record for 1937 was set by a cow named 161147 who also held the butter record for 1937 with 1,071 lbs. of milk and 1,210 lbs. of butter. She is an outstanding cow and took first prize in the dry cow class at Vancouver and Victoria in 1937. For Canada, for both milk and butter is held by Strathmore Lady McKinley—143386—recorded her records under Government regulation, in 1931, with 34,569 lbs. of milk and 1,165 lbs. of butter. She is a remarkably fine beast of the best of Holstein pedigree, as is shown by her face line.

Mrs. R. Klemm Dies After Auto Accident

Left Redcliff For Peace River
on Wednesday Morning

In an auto accident just three miles west of town yesterday morning, Mrs. Rochus Klemm, who has been a resident of Redcliff for the past two years, received injuries from which she died shortly after the accident.

Mr. and Mrs. Klemm left Redcliff about 11 o'clock Wednesday morning intending to motor to Peace River district where Mr. Klemm had taken up a homestead a year ago. When just three miles out of town the car ran into some loose dirt on the highway and skidded into the ditch, throwing Mr. Klemm clear and lighting on top of Mrs. Klemm. A car passing at the time rushed the injured woman to the hospital where it was found her neck was broken and she passed away shortly after. One limb was also broken.

Deceased came to Canada from Hungary four years ago to join her husband, who came out the previous year. The family came to Redcliff a few years ago where until recently Mr. Klemm had been engaged at the Dominion Greenhouse.

Deceased, who was 44 years of age, leaves a family of three sons and three daughters. Andrew, one of the popular players on the Diamond D. football team, is the second oldest and the youngest is ten.

At the coroner's inquest held in Medicine Hat on Wednesday evening a verdict of accidental death, attaching no blame to any one, was brought in by the jury.

The funeral will take place Friday morning from St. Patrick's church, Medicine Hat.

Fred Perceval who left Redcliff, Alberta three years ago to become the Earl of Egmont and take over an immense estate in England, died last Sunday as a result of an auto accident.

Western plains have been given a boost by the fact that the last days of April and farmers of the province are looking forward to the seedling conditions and good prospects of crop success, according to information furnished by the Canadian Pacific agricultural department crop report.

Following the announcement of reduced ocean rates on Canadian Pacific ships on the Atlantic, one of the largest parties ever to leave Toronto at this time of year for the Old Country sailed recently aboard the Duchess of York. There were 275 in the party drawn from all parts of eastern Ontario but mostly from Toronto.

The first cases of roses and shrubs from France for Grand Prix Royal Scotie, arrived there recently. They are from Chateaufort, France, the fifth the marrow of that town. Chateaufort is one of the places in France where the oldest scadians settled after the Grand Prix expedition.

Four stretches of new Brunswick road and salmon sections were sold at the Department of Lands and Mines office for prices totalling \$5,500. These sections for a term of 10 years are on the Bonaventure, Redoubt, Matamoras and the Bonaventure lines and price paid are the annual rental charges.

Daylight saving time, commenced in Quebec and Ontario provinces May 1, occasioned little confusion on Canadian Pacific travel. Travelers have nowadays learned that the railway remains on standard time and govern themselves accordingly. The railway announced a number of train time alterations to be in effect on the introduction of daylight saving.

From little Norfolk Island in the South Pacific, one of the smallest islands in the British Empire, an excellent sample of bears for exhibition at the Royal Ontario Exhibition and Conference to be held at Regina July 1st has just arrived. Norfolk Island is the birthplace of the "Bounty" in 1840 but it has long ago changed its name to a prosperous settlement.

Cash Prizes For Destroying Pests

Cash prizes ranging from \$50 to \$200 will be paid by the provincial department of agriculture for gopher tails, foot and eggs of crows and magpies taken in 1937 or before Sept. 1st. The competition will be judged on points as follows: one point for each gopher tail; two points for a crow's or magpie's foot and four points for each of the latter's eggs. 200 points must be earned to qualify. The object of this is to rid the country of these pests. For a copy of the regulations apply to Game Branch, Dept. of Agriculture, Edmonton.

Applications For Booths

Approximately 150 of the best Alberta beef cattle are being shipped to the British market each week, according to H. A. Craig, deputy minister of agriculture. These shipments are being made from a large herd of about 1800 head of cattle fed all winter near Medicine Hat by special arrangement with ranchers and farmers.

Here and There

Practically an egg a day is eaten by every man, woman and child in the Dominion. It is the highest per capita consumption of eggs in the country, according to an official computation.

Canada's gold production in 1937 reached the new high total of 2,682,770 ounces valued at \$45,479,800. This is the highest ever above the 1930 production. Of this total the province of Ontario accounted for 2,201,000 ounces valued at \$37,500,000.

New Brunswick can now claim a white squirrel. The animal was caught by Jack Feinberg of Fredericton who trapped it near the village of Grand Falls. It has been brought to the government and will be maintained.

Ben Cairns Wilson, Canada's only woman Senator, arrived recently at Quebec, Canada, from a trip through Europe. While in London she visited the House of Lords, but could not make comparisons with the Senate since the House was not in session.

Says Farmers Should Pay More Attention To Marketing Instead Of Concentrating On Production

Expressing the belief that the next 25 years would see the emancipation of agriculturists from domination by buyers outside themselves, H. S. Arkell, secretary of the Canadian Livestock Pool and president of the Canadian Society of Technical Agriculture, speaking at a gathering of the latter organization at Saskatoon, asked their assistance in that regard.

The society had made great strides since it was formed in 1921, and now included most of the technically trained agricultural men of the Dominion. In the past the members had chiefly concerned themselves with their own jobs and the co-ordination of work done under different authorities to make it efficient. They had accomplished a great deal in that direction.

But Mr. Arkell believed the time had come for the society to pay attention to studying the condition of agriculture. It was for the betterment of agriculture that they had received their training.

From the point of view of the farmer, the selling machinery under the old methods had failed them. The credit machinery had fallen down and they would find that the majority of farmers believed that the selling machinery of agriculture was failing to accomplish the purposes of the farmers.

Agriculture had taken care only of production and left someone else to take care of marketing. In all other businesses an increasing proportion of the brains was devoted to merchandising. Something should grow up in technical agriculture in regard to the business end as in production. It was planned, the speaker said, to hold the annual convention of the society in Winnipeg in June. It might be possible to secure speakers from the economic conference.

Dr. L. E. Kirk, the Canadian physiologist, suggested that other business men had perhaps devoted too much attention to merchandising and persuading the people to buy what they did not want, rather than that agriculture had given too exclusive attention to production.

W. A. Munro, Rotherham experimental farm, agreed that farmers at the present time were much more concerned with what they were to do with what they had produced than with how to produce more or better articles.

Guests introduced at the gathering included: C. H. Gilbert, Big River, spring wheel champion of the Chicago show, and Andrew Anderson, Alaisk, recently designated "master farmer."

To Settle War Debts

Suggests Exchange Of African Territory Instead Of Cash Repayments To Be Made

The rich Congo basin, lying in the heart of equatorial Africa, is proposed as payment by debtor countries, in the stead of cash repayments to the United States, by Stephen Leacock, head of the Department of Political Economy at McGill University, Montreal, in an article appearing in the New York Herald-Tribune Sunday magazine section.

Describing this area of 1,500,000 square miles, now owned in its three divisions by Belgium, France and Great Britain, as "exuberantly fertile," Professor Leacock points to the great possibilities of development. He sees the great Congo River as the real gateway for African trade, and says a real respect for the needs of the Congo would "become one of the great harbors of the world's shipping."

He says the United States with its money, machinery and brains, is the one country to undertake the great development. Thus, would be set in motion, he believes, "a new world movement of prosperity."

"How did you get so much strength in your mouth?"
"I have exercised my teeth with your teeth."—H. 490, Florence.

Greater Precipitation

Report Of Meteorological Service For Months Of December Is Encouraging

Precipitation in Saskatchewan over the entire portion, during December, 1931, was approximately twice that of December of the normal year, according to the report of the Dominion meteorological service for the month.

In average years, precipitation in December varies from ten tenths to about eight-tenths of an inch. During December, 1931, from one inch to one and a half inches was reported over a considerable area in Saskatchewan.

In the extreme southeast and in a small area to the east of the Cypress Hills several points were exceptions, reporting less than four-tenths of an inch of precipitation received during December.

Alberta rejoiced in precipitation that was in excess of the normal. In December from one inch to one and a half inches was reported from a considerable portion of the plains. Unusually heavy precipitation in these areas varies from less than one-half to about three-quarters of an inch.

As to December precipitation in the west, where most sections received less than half an inch and some less than one-tenth.

In the majority of years, December precipitation is slightly greater in Manitoba than in Saskatchewan, ranging from one-half inch to one inch.—Regina Leader.

Apples Are Cheap Food

Essential Part Of Diet And Suitable For Every Meal

In a period like the present, when the amount of money available for food may be limited, apples are an essential part of the diet, says Miss Fleta Clark, of the Missouri College of Agriculture. "Apples are suitable for every meal in the day and are often enjoyed between meals also," she goes on.

In the majority of years, apples serve as a breakfast fruit, and with bacon or sausage they may accompany the meat dish. For dinner they are especially good with fresh or cured pork, no matter how it is cooked. They are adapted to cooking with many vegetables, as baked with sweet potatoes, fried with carrots or scalloped with cabbage. A wide variety of salads may be made from apples, either raw or cooked with vegetables, and the choice of apple desserts is almost unlimited.

Noise Affects Eyesight

One person in every five in the towns and cities is wearing, or ought to be wearing, spectacles. The proportion in the rural areas is any one in every 100. An eye specialist said:—"During the war one of the effects of shell-shock was a narrowing of the victim's vision. Perfect eyesight depends on perfect nerves, and nerve dwellers today are exposed to nerve-shattering barrage of noise which differs only in degree from a great gun cannonade."

Neighbour: "Er—Mrs. Brown— you've got odd stockings on." Mrs. Brown: "Yes, dearie, that 'appens in idleness what 'ave got more than one pair."

A writer asserts that a man's character can be told by the books on his library shelf. Then most of our friends are bibliomaniacs.

Henry Reed, 50, who left the reception of her home only four times in 67 years after her father forbade her saying goodbye to her soldier sweetheart in the revolution of 1861, is dead at Birmingham, N.Y. Miss Reed spent herself in her home and left only four times in 67 years for the funeral of a relative—during the ensuing 67 years.

An owl statue because its eyes are fixed immovably in their sockets.

Egg Exports From B.C.

Are Bringing Producers Over Five Thousand Dollars Daily

British Columbia hens are bringing into the pockets of poultry owners, as a result of growing volume of shipments of eggs outside the province, in the neighborhood of \$5,000 a day.

The B.C. Egg Pool is shipping to the prairies and eastern Canada three and four carloads of eggs weekly. Private firms are adding further shipments, which, according to R. C. Wilson, of the poultry division, Dominion Live Stock Branch, bring the total up to one carload daily.

Each carload at Montreal brings an average of \$7,000. There must be deducted from this freight charges of approximately \$800 and handling charges of five cents a dozen.

The egg industry is at present the liveliest department of agriculture in British Columbia. Distribution of \$5,000 a day among poultry ranchers is bound to stimulate confidence in the poultry industry.

Egg prices are much lower than at the same time in 1930. Production is also lower. Nevertheless, present prices are attractive to the coast poultry owners. Lower feed prices and lower labor costs help to make up for the reduced prices received for the product.

George P. Wallace, president of the B.C. Egg Pool, reports falling off of production of eggs elsewhere in Canada.

Prof. E. A. Lloyd, University of British Columbia, says that the present export of eggs is but the beginning.

"I look to see British Columbia poultrymen exporting eggs to overseas markets as well as our domestic markets," said Professor Lloyd.

France Buying Wheat

French Government Contracting For Ten Million Bushels Of Canadian Grain

Delivery has started on a French government contract to buy 10,000,000 bushels of Canadian hard spring wheat, the United Press learns.

The agreement represents a repetition of an order for a similar amount in 1930. Delivery will continue for two months.

It was understood that France expects a reciprocal concession from Canada favoring other French wines or silks, but no agreement has been reached.

It was estimated that France will require 11,000,000 bushels of foreign wheat to meet the deficit in domestic supplies.

Wheat representatives were awaiting indications of whether the foreign office would continue the policy of buying Central European wheat for political reasons, or would buy the balance in the open market from Canada, the United States and Argentina.

Advertising Always Pays

The business has not been found in which "advertising does not pay."

What capital is to industry, what rainfall is to farm soil, advertising is to business. Advertising is as necessary to national distribution as the railways.

The reason people are patient with statesmen is because they don't know what to do, either.

Nearly 40 irrigation projects are to be launched in Jug-Slavia in the next four years.

BRITISH SPEED EXPERTS PLAN SERIOUS INVASION OF EUROPE

An invasion by a team of British racing drivers with British cars into the most cherished preserves of Continental road racing is being planned by a group of the best drivers in the Motherland. The Italian "Mille Miglia" or 1,000-mile race, held every spring, is the only contest of its kind, and last year, for the first time in the history of the race, an English car competed, driven alternately by an English and an Italian driver, neither of whom was a member of the team.

This year, April 9 and 10, British drivers propose to enter a team of three cars, which would be driven by the best racing team the Motherland could produce. Sir William Morris, British motor magnate, will back the team, and Sir Henry Birrell (right), will be one of the drivers. It is expected Lord Howe will captain the team.

"You are handy-legged, Freddie!" "That is nothing. You ought to have seen my brother. He was so handy-legged that he had to be buried in it—had been killed in the Italian half-Times, Gothenburg."

Scientists Hope To Procure Facts And Figures To Test The Theory That Continents Float

Sensitive To Weather Changes

Animals Are Very Quick To Notice Any Variations In Weather

Animals are amazingly sensitive to changes of weather, and some very interesting observations have been made as to how they behave under such circumstances. We have all seen the antics cats get up when a storm is approaching. They wander restlessly to and from, and suddenly dart about the house and garden in a most surprising manner. Cats, too, wash right over their ears when rain is approaching. The following are other unmistakable signs of changing weather: In mountainous districts sheep change their feeding ground to the lee side, or side opposite the wind, of the hills before the arrival of gales and rain. Little field mice, too, appear to know when cold and snow will set in, for they have been observed to leave their holes carefully before hard weather comes. Ducks invariably fly busily before any change of weather, and if bees return to the hive and do not come out again for a time rain is indicated.

Hidden away in vaults in Dominion observatories at Victoria and Ottawa are scientific records that may prove or disprove some day the truth of the theory that North America and the other continents are not fixed or stationary. Dr. Alfred Wegener, the Austrian geologist who lost his life in Arctic exploration, laid down the theory that continents float on a sea of molten rock like rafts on a quiet ocean. Canadian scientists hope to supply the facts and figures that will determine the accuracy of the theory.

Canada is vitally interested in the Wegener theory because Greenland is supposed to be the "speed king" among the continents, crawling westward at a rate estimated as high as six miles a year. The theory would be confirmed by any land measurements made especially along the Labrador Coast, the Maritime Provinces and the New England coast.

Measurements were extended around the world with the aid of beam wireline. The positions of America, Greenland and other continents were plotted as minutely as possible. The observations will be repeated in 1933 and again in 1935, and any variation in the plottings will be noted. By this method it is hoped to establish the accuracy of Dr. Wegener's hypothesis.

The first evidence to substantiate the drifting theory was established in 1907 by L. B. Koch, German explorer. In 1912, 24 years earlier—Sir Edward Sabine, British explorer, made longitudinal observations in the Arctic. In 1914, Sir Robert Peary's land readings at the same spot, the figures did not correspond. The only explanation was that Greenland had drifted several miles toward North America in the intervening years.

Great Natural Asset

Of Great Industry

High Grade Clay Deposits In Saskatchewan May Prove Foundation

One of the greatest natural assets of the prairie provinces is constituted in the high grade clays of southern Saskatchewan, said C. M. Hart, assistant director of development for the Canadian Pacific Railway, speaking at a luncheon held by the officers association of the company at the Royal Alexandra Hotel in Winnipeg. He said that they would in time be the means of support for an immense clay products industry.

In describing these valuable western resources, Mr. Hart told of the general work of his department in fostering Canadian industry by locating deposits, securing title and sources of other raw materials and by assisting in bringing these materials into use. W. C. Casey, president of the association, was chairman.

Fewer Wolves Taken

Export Of Wolf Pelt Shows Signs Of Falling Off

Production and export of wolf pelts are falling off, which opens up the question as to whether or not wolves are decreasing in Canada.

In the calendar year 1931 the export of the skins of wolves totaled 41,972 at a value of \$383,652, according to the records of the Dominion Bureau of Statistics. In 1929 the export was 86,708 wolf pelts at a value of \$1,503,470.

Saskatchewan is the first province to make returns for the hunting season of 1930-31, when 115 timber wolves and 9,063 coyotes were taken. In 1929-30 the take was 134 timber wolves and 12,717 coyotes.

Built to house 150 guests, a hotel in Antrim, England, which is becoming quite a popular holiday resort, has not a single bathroom. The town itself has a public water supply.

Farm For Strayed Animals

Fifteen Acres Operated By Voluntary Workers For Strayed Animals

"The League of Justice To Animals" with voluntary workers operate a farm of 15 acres at Montreal, where lost, strayed or unwanted animals found on the streets of Montreal and environs are taken, and when not claimed within a reasonable time are placed with new owners. At this home there are adequate kennels for cats and dogs, pens for horses and good grazing land with plenty of shade trees. Every type of creature is cared for from goats to canaries. Horses whose owners are too poor to feed them properly are taken and within a short time returned in good condition.

In the society's 6 years of befriending the dumb animals, it has had four Christmas trees set up in various parks and squares here distributing hay, corn and oats to 100 horses yearly.

Mr. F. O. McLean and daughter, Miss Vina, of Lethbridge, but formerly of Redcliff, motored to town last week on business. While here they called on several old friends.

During the past week A. R. Ballantyne has purchased the Ed Wallor house on Fourth St. It is Mr. Ballantyne's intention to have some alterations made before moving into the house.

Mr. and Mrs. Henry Kitchen, Mrs. Kitchen sr. and Mrs. and Mrs. McDermott motored over to Raymond last week end, to visit Mr. Isaac Kitchen and Miss Dorothy who are at present located there.

"Uneasy rests the head that wears the crown". Although this phrase was written many years ago it appears it is being demonstrated very clearly during the past few weeks with the assassination of the Presidents of both France and Japan and several other attempted assassinations.

FOR SALE—Two good shacks on first street. What offers? Apply W. Forecast, fifth st. after six.
